PROFESSIONAL SUMMARY

Software Engineering graduate focused on Python/Django web development, backend development, and full-stack web applications. Hands-on experience with Django, FastAPI, React, PostgreSQL, MongoDB, SQLite, REST APIs, authentication, responsive UI, deployment, and debugging. Completed a remote UK Python Developer internship and delivered a project-based freelance Django web application for an online forum client. Currently learning DevOps fundamentals including Docker, Linux, deployment workflows, and CI/CD basics.

SKILLS

Backend/Web : Python, Django, Django REST Framework (DRF) concepts, FastAPI, REST APIs, JavaScript, HTML5, CSS3
Databases : PostgreSQL, MySQL, MongoDB, SQLite, Django ORM, relational database design, query optimization
Frontend/UI : Bootstrap, Tailwind CSS, AJAX, responsive web design, user-facing workflows
Tools/Deployment : Git, GitHub, Linux, Docker, Docker Compose, image builds, containers, PythonAnywhere, debugging
Automation : Selenium, Playwright, Beautiful Soup, Python scripting
Plus : Basic cloud concepts, deployment workflows, CI/CD fundamentals, web scraping/automation

EXPERIENCE

Neuro Nimbus AI Feb. 2026 – May 2026
Python Developer Intern Remote, UK

- Worked remotely with a UK-based team on Python development, backend support, automation, debugging, and data-handling tasks relevant to production software workflows.
- Supported application functionality using maintainable code practices, Git workflows, relational database concepts, backend debugging, and team collaboration.
- Strengthened practical skills in Python, Django/FastAPI backend concepts, API-oriented development, debugging, and professional software delivery.

Project-Based Freelance Web Developer Sept. 2023
Full-Stack Developer Remote, Online Forum Client

- Delivered a client-ready Django web application project sourced through an online forum, from requirements understanding to backend development and deployment support.
- Built authentication, Django ORM/database-backed workflows, responsive pages, and user-facing features using Django, PostgreSQL, AJAX, and Bootstrap.
- Deployed the project on PythonAnywhere and resolved backend, database, and configuration issues during delivery.
- Used Git, Linux-based workflows, Docker image builds, containers, and Docker Compose while keeping the codebase maintainable and deployment-ready.

PROJECTS

Car Selling Platform Django, PostgreSQL, Django ORM, AJAX, Bootstrap | Sept. 2023

- Developed a full-stack Django web application with authentication, car listings, notifications, and database-backed workflows.
- Used Django and PostgreSQL for backend functionality; integrated AJAX for smoother user-facing interactions.
- Applied clean backend structure, relational database workflows, debugging, and deployment-ready configuration for practical product use.

Blogging Website Django, PostgreSQL, Bootstrap, Deployment | Jul. 2022

- Built a responsive blogging platform with user registration, article posting, comments, and database-backed content.
- Deployed the application on PythonAnywhere and configured it for production use across desktop and mobile devices.

EDUCATION

Superior University Sargodha Completed 2026
BS Software Engineering Sargodha, Pakistan
Superior Group of Colleges Bhalwal 2020 – 2022
Intermediate in Computer Science Bhalwal, Pakistan

CERTIFICATIONS

Python & Django: Complete Web Development – Udemy
Docker for Beginners – Udemy
Become a Django Developer – LinkedIn Learning
